

# SHIFT AND SAVE THIS SUMMER

with ComEd's Hourly Pricing Program

# SHIFT AND SAVE

**This summer, reduce energy usage on weekdays between 1 and 5 p.m.,\* and take advantage of lower prices on nights and weekends.**

**[ComEd.com/HourlyPricing](https://ComEd.com/HourlyPricing)**

**\*During the summer, electricity prices are typically highest between 1 and 5 p.m. Depending on market conditions, prices can vary from this typical pattern. Savings cannot be guaranteed.**

## NEW ENHANCED ALERTS FOR THE SUMMER

Hourly Pricing alerts have been enhanced to help you save even more. The alerts will tell you to either **reduce now or tomorrow**. Additionally, to increase your savings you can expect to receive more alerts.

Alerts are sent when electricity prices are trending high or when electricity demand is expected to peak the following day.

No matter when an alert tells you to reduce, just take the same actions you normally would -- like delaying the start of major appliances or raising your air conditioner thermostat by a few degrees. For more information on Hourly Pricing alerts, visit the FAQs at [ComEd.com/HourlyPricing](http://ComEd.com/HourlyPricing).

## TAKE THREE SIMPLE ACTIONS WHEN ALERTS ARE SENT:

Use an outdoor grill or microwave instead of the oven or stovetop on a hot summer day.

Use your major appliances during lower-priced hours, like nights and weekends.

When you're out, reset your thermostat to a higher temperature so it's not cooling empty rooms.

## DIGITS UP TO DATE?

Sign up or update your Hourly Pricing Alert notification preferences by logging into your My Hourly Pricing Account at [ComEd.com/HourlyPricing](http://ComEd.com/HourlyPricing).

You can receive notifications via email, text or phone. You can also see your personalized usage trends and savings information 24/7.

## THERMOSTAT SETTINGS FOR PRE-COOLING

Run your air conditioner overnight to help you save. If you take advantage of low overnight electricity prices and make your home extra cool, your home will retain this cool air throughout the following morning and afternoon, so you don't need to run your air conditioner when electricity prices may be more expensive.

## GET INSTANT ONLINE REBATES AND MORE!

Have you visited ComEd Marketplace? Get instant rebates on energy-efficient products for your home that help you save energy and money, such as smart thermostats and LED lightbulbs. And find connected home security products that provide you with peace of mind. Plus get FREE shipping on orders of \$49 or more! Have a look at [ComEd.com/SummerReadyMarketplace](https://www.comed.com/SummerReadyMarketplace).

Hourly Pricing participants have  
saved more than  
**\$16 million**  
since the program began in 2007

And reduced more than  
**44 million kWh**  
in energy use

That's like preventing the same  
emissions from a road trip that  
stretches more than:  
**87 million miles**
