

SHIFT AND SAVE THIS SUMMER

with ComEd's Hourly Pricing Program

SHIFT AND SAVE

This summer, reduce energy use on weekdays between 1 and 5 p.m.,* and take advantage of lower prices on nights and weekends.

ComEd.com/HourlyPricing

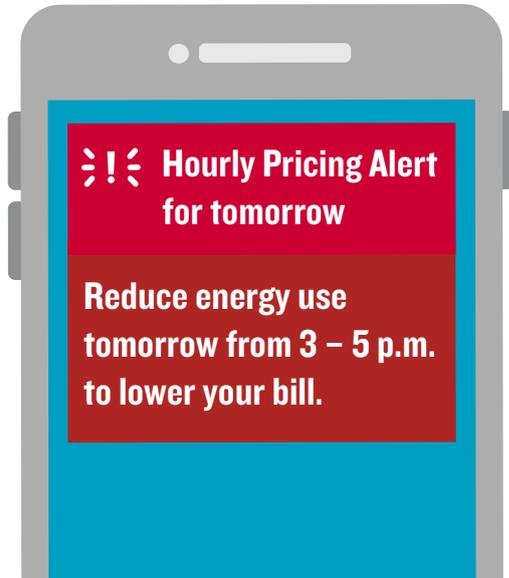

***During the summer, electricity prices are typically highest between 1 and 5 p.m. Depending on market conditions, prices can vary from this typical pattern. Savings cannot be guaranteed.**

DON'T MISS OUT ON HOURLY PRICING ALERTS

Don't sweat it if there's a heat wave this summer. Hourly Pricing Alerts help you save by telling you to reduce now or tomorrow. Alerts are sent when electricity prices are trending high or when energy is expected to be in high demand the following day so you'll never miss an opportunity to reduce your usage.

If you receive an alert, just take the same actions you normally would, like delaying the start of major appliances or raising your air conditioner's temperature by a few degrees.

Subscribe to or update your alert notification preferences by logging into your My Hourly Pricing Account, which is different from your ComEd.com account and can be accessed at ComEd.com/HourlyPricing. Alerts can be sent to you via email, text message, or phone call.

THREE SIMPLE ACTIONS TO HELP YOU SAVE

Use your microwave or outdoor grill instead of the oven or stove. You'll use less energy and avoid heating your home unnecessarily.

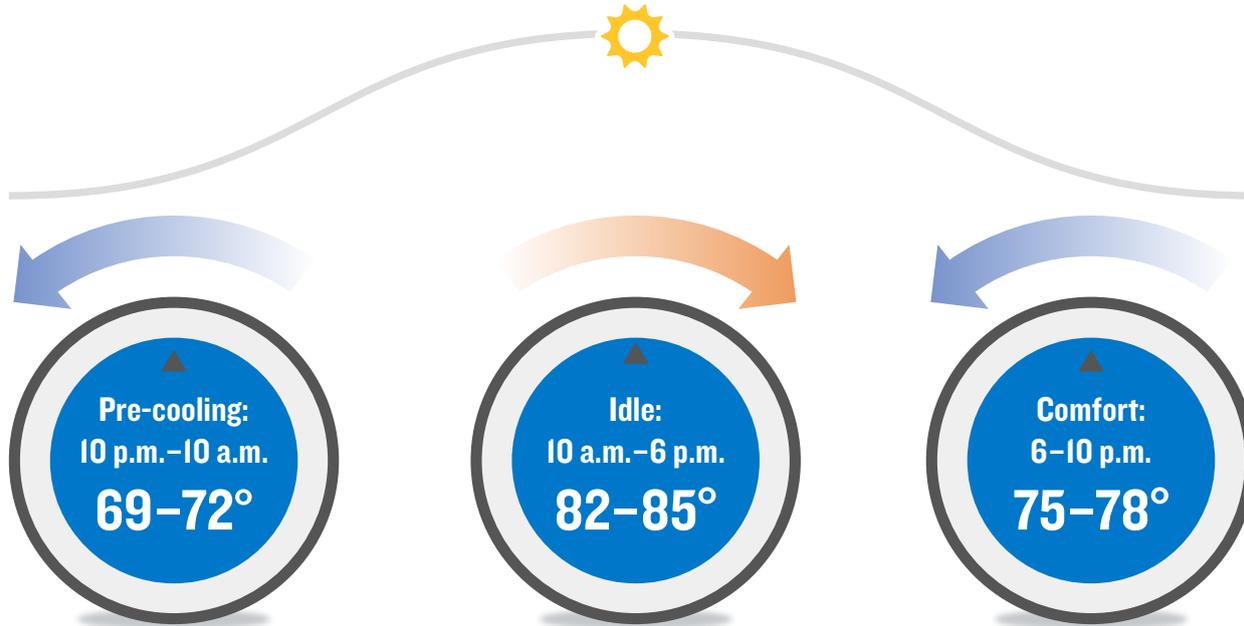

Set your ceiling fans to spin counter-clockwise to help you save. Air circulating through your home helps you feel cool even if it's hot outside.

Close your curtains and blinds to keep sunlight from heating your home during the day. Open your windows at night for free, natural ventilation.

PRE-COOLING: YOUR BIGGEST SAVINGS OPPORTUNITY

Run your air conditioner during nights and early mornings when energy prices are lower to make your home extra cool and help you save. Your home will retain this cool air the following day, so you won't need to run your air conditioner when energy prices are typically higher.

AUTOMATE AND SAVE WITH SMART HOME TECH

Head to ComEd's Marketplace to get instant rebates and discounts on energy-efficient products for your home that help you save money and energy, like smart thermostats and LED lightbulbs. See what's in store for your home at [ComEd.com/SummerReadyMarketplace](https://www.comed.com/SummerReadyMarketplace). If you purchase or already have a smart thermostat, make sure to connect it to the Hourly Pricing Automation Tool for even more control over your energy use and savings. Get started at [IFTTT.com/ComEd_HourlyPricing](https://www.ifttt.com/ComEd_HourlyPricing).
