How to Create Your Own IFTTT Applet and Use the IFTTT App

to Control Your Home's Smart Technologies and Connected Devices

1. Visit IFTTT.com and create your own IFTTT account. (Bonus: install the IFTTT app on your smartphone for added convenience).

2. Click the

My Applets

box at the top of your screen.

3. Click the

New Applet

button at the top right side of your screen.

4. Click the **"+this"** part of the

if +this then that

graphic.

5. Search for the trigger, or condition, that you will use to tell your smart technology or connected device to take action.

Choose a service
Step 1 of 6

🔍 ComEd Hourly Pricing

6. Click on the desired item, service or trigger.

ComEd Hourly Pricing

7. Select your trigger, then enter the conditions, thresholds or other criteria by which it will activate.

8. Click **"Create Trigger."**

9. Click the **"+that"** part of the

if then +that

graphic.

10. Search for the smart technology or connected-home device that will take action based on your trigger.

Choose action service
Step 3 of 6

🔍 Ecobee

ecobee

11. Enter the action you wish your smart technology or connected-home device to perform when triggered.

12. Name your applet and then choose whether to have notification sent to you every time it's activated!
